

Resistag III / III-A

1. Lightweight
 - 45 lbs
 - Easily portable
2. No compressed air required
 - Strictly Electrical Machine (110V/220V)
3. Construction
 - Fully enclosed to keep out dust and foreign objects
 - Increased protection surrounding upper heating head
 - Large opening provides increased work area reducing the risk of accidental burning.
4. Ceramic Heaters
 - Heats up to 400 degrees in less than 2 minutes
5. Energy saving cycle
 - The energy saving cycle reduces heat to a minimum (therefore reducing energy consumption) after the machine has not been used for a pre-defined time (set by user)
 - Once reactivated, the temperature quickly restores to normal heat seal setting
6. Digital Readout
 - Temperature (F or C)
 - Time
 - Sleep Mode
7. Adjustable Pressure
 - Adjustable pressure platen
8. Durable
 - Able to handle larger work loads than smaller or less expensive heat seal machines
9. Automatic Model
 - Reduces that opportunity for garment scorching by automatically raising the head of the machine from the garment after pre-set dwell time has expired.
10. Meets CE Standards
 - European standards similar to UL
